Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 7, *Representation and terms*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 121, *Welding and allied processes*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fifth edition cancels and replaces the fourth edition (ISO 4063:2009), which has been technically revised.

The main changes are as follows:

- incorporation of processes and reference numbers for welding and thermal joining of plastics.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html. Official interpretations of ISO/TC 44 documents, where they exist, are available from this page: <https://committee.iso.org/sites/tc44/home/interpretation.html>.

Welding, brazing, soldering and cutting — Nomenclature of processes and reference numbers

1 Scope

This document establishes a nomenclature for:

- welding;
- brazing, soldering and weld brazing;
- thermal cutting;

with each process identified by a reference number.

It covers the main processes (one digit), groups (two digits) and sub-groups (three digits). The reference number for any process has a maximum of three digits. This system is intended as an aid in computerization and the drafting of, for example, drawings, working papers and welding procedure specifications, and enables the uniform international designation of the processes.

This document does not cover all process variants. The process numbers can be supplemented with additional information for variants not listed.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

No terms and definitions are listed in this document.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <https://www.electropedia.org/>

4 Designation

4.1 General

Where a full designation is required for a joining process, it shall have the following structure: the number of this document (i.e. "ISO 4063"), separated by a dash from the reference number of the process, as shown in these examples.

EXAMPLE 1 Process "Cold pressure welding" with reference number 48 is designated as:

ISO 4063 – 48

EXAMPLE 2 Process "Radio frequency welding" with reference number 62 is designated as:

ISO 4063 – 62

EXAMPLE 3 Process "Heated wedge welding with hot gas" with reference number 662-A is designated as:

4.2 Hybrid joining processes

When multiple processes are used simultaneously in one process area, the processes shall be described using the designations for each process separated by the symbol “+”.

EXAMPLE Process “Gas laser welding” (reference number 522) together with process “Plasma arc welding” (reference number 15) is designated as:

ISO 4063 – 522 + 15

5 List of processes and reference numbers

5.1 General

The first designation listed is the preferred one and any subsequent designations are synonyms. Terms used in the United States of America (USA) are shown for information where there are differences.

[Annex A](#) provides supplementary options for process variants.

[Annex B](#) provides an overview for replaced and obsolete processes.

[Annex C](#) provides a list of commonly used acronyms and abbreviations for the welding processes in the United States of America included in this document.

5.2 Welding

1 Arc welding

11 Metal arc welding without gas protection

111 Manual metal arc welding

Shielded metal arc welding, USA

112 Gravity welding

Gravity arc welding with covered electrode

Gravity feed welding, USA

114 Self-shielded tubular cored arc welding

12 Submerged arc welding

121 Submerged arc welding with solid wire electrode

122 Submerged arc welding with strip electrode

124 Submerged arc welding with metal powder addition

125 Submerged arc welding with tubular cored electrode

126 Submerged arc welding with cored strip electrode

13 Gas-shielded metal arc welding

Metal inert gas (MIG) welding/Metal active gas (MAG) welding

Gas metal arc welding (GMAW), USA

- 131 MIG welding with solid wire electrode
GMAW using inert gas and solid wire electrode, USA
- 132 MIG welding with flux cored electrode
Gas shielded flux cored arc welding, USA
- 133 MIG welding with metal cored electrode
GMAW using inert gas and metal cored wire, USA
- 135 MAG welding with solid wire electrode
GMAW using active gas with solid wire electrode, USA
- 136 MAG welding with flux cored electrode
GMAW using active gas and flux cored electrode, USA
- 138 MAG welding with metal cored electrode
GMAW using active gas and metal cored electrode, USA
- 14 Gas-shielded arc welding with non-consumable tungsten electrode
Tungsten inert gas (TIG) welding/Tungsten active gas (TAG) welding
Gas tungsten arc welding (GTAW), USA**
- 141 TIG welding with solid filler material
GTAW using inert gas and solid filler material, USA
- 142 Autogenous TIG welding
Autogenous gas tungsten arc welding using inert gas, USA
- 143 TIG welding with tubular cored filler material
GTAW using inert gas and tubular cored filler material, USA
- 145 TIG welding using reducing gas and solid filler material
GTAW using inert gas plus reducing gas additions and solid filler material, USA
- 146 TIG welding using reducing gas and tubular cored filler material
GTAW using inert gas plus reducing gas additions and tubular cored filler material, USA
- 147 Gas-shielded arc welding with non-consumable tungsten electrode using active gas
TAG welding
GTAW using active gas, USA
- 15 Plasma arc welding**
- 151 Plasma MIG welding
- 152 Powder plasma arc welding
- 153 Plasma welding with transferred arc
- 154 Plasma arc welding with non-transferred arc
- 155 Plasma arc welding with partially transferred arc

18 Other arc welding processes

185 Magnetically impelled arc welding

2 Resistance welding

21 Resistance spot welding

211 Indirect spot welding

212 Direct spot welding

22 Resistance seam welding

221 Lap seam welding

222 Mash seam welding

223 Prep-lap seam welding

224 Wire seam welding

225 Foil butt-seam welding

226 Seam welding with strip

23 Projection welding

231 Indirect projection welding

232 Direct projection welding

24 Flash welding

241 Flash welding with preheating

242 Flash welding without preheating

25 Resistance butt welding

Upset welding, USA

26 Resistance stud welding

27 HF resistance welding

High-frequency resistance welding

High-frequency upset welding, USA

29 Other resistance welding processes

3 Gas welding

Oxyfuel gas welding, USA

31 Oxyfuel gas welding

311 Oxyacetylene welding

312 Oxypropane welding

313 Oxyhydrogen welding

4 Welding with pressure**41 Ultrasonic welding**

411 Ultrasonic hot welding

412 Ultrasonic spot welding

413 Ultrasonic seam welding

414 Ultrasonic torsion welding

42 Friction welding

421 Direct drive friction welding

422 Inertia friction welding

423 Friction stud welding

424 Linear friction welding (generally referred to as “vibration welding” when the base materials are plastics)

425 Radial friction welding

426 Orbital friction welding

43 Friction stir welding

431 Friction stir spot welding

432 Refill friction stir spot welding

433 Stitch friction stir spot welding

434 Swept friction stir spot welding

435 Swing friction stir spot welding

44 Impact welding (referred to as shock welding in ISO/TR 25901-3:2016, 2.2.1.6.10)

441 Explosion welding

442 Magnetic pulse welding

45 Diffusion welding

451 Hot isostatic pressure welding

47 Oxyfuel gas pressure welding**Pressure gas welding, USA****48 Cold pressure welding****Cold welding, USA**

481 Cold pressure extrusion welding

49 Hot pressure welding

491 Hot nozzle welding

492 Nail head welding

493 Coextrusion welding

5 Beam welding

51 Electron beam welding

511 Electron beam welding in vacuum

512 Electron beam welding in atmosphere

513 Electron beam welding with addition of shielding gases

52 Laser welding

Laser beam welding, USA

521 Solid state laser welding

522 Gas laser welding

523 Diode laser welding

Semi-conductor laser welding, USA

6 Plastics-specific welding processes

61 Resistive implant welding

611 Electrofusion welding

62 Radio frequency welding

High-frequency welding

Dielectric welding

63 Solvent welding

631 Solvent cement welding

64 Hot gas welding

641 Hot gas speed welding

642 Hot gas round nozzle welding

643 Hot gas manual welding without welding rod

644 Hot gas machine welding without welding rod

645 Hot gas machine welding with welding rod

646 Hot gas convection welding

647 Extrusion welding

65 Heat sealing

651 Impulse welding

652 Hot bar welding

66 Heated tool welding

661 Hot plate welding

662 Heated wedge welding

663 Socket fusion welding

664 Saddle fusion welding

67 Flash-free welding

671 Flow fusion welding

69 Other plastics-specific welding processes

691 Microwave welding

692 Staking

7 Other welding processes**71 Aluminothermic welding****Thermite welding, USA****72 Electroslag welding**

721 Electroslag welding with strip electrode

722 Electroslag welding with wire electrode

73 Electrogas welding**74 Induction welding**

741 Induction butt welding

Induction upset welding, USA

742 Induction seam welding

743 High frequency induction welding

75 Light radiation welding

753 Infrared welding

78 Arc stud welding

783 Drawn arc stud welding with ceramic ferrule or shielding gas

784 Short-cycle drawn arc stud welding

785 Capacitor discharge drawn arc stud welding

786 Capacitor discharge stud welding with tip ignition

5.3 Thermal cutting**8 Cutting and gouging**

81 Flame cutting

Oxygen cutting

Oxyfuel cutting, USA

82 Arc cutting

821 Air arc cutting

Air carbon arc cutting, USA

822 Oxygen arc cutting

83 Plasma cutting

Plasma arc cutting, USA

831 Plasma cutting with oxidising gas

832 Plasma cutting without oxidising gas

833 Air plasma cutting

834 High-tolerance plasma cutting

84 Laser cutting

Laser beam cutting, USA

86 Flame gouging

Thermal gouging, USA

87 Arc gouging

871 Air arc gouging

Air carbon arc cutting, USA

872 Oxygen arc gouging

Oxygen gouging, USA

88 Plasma gouging

5.4 Brazing and soldering

9 Brazing and soldering

91 Brazing with local heating

911 Infrared brazing

912 Flame brazing

Torch brazing, USA

913 Laser beam brazing

914 Electron beam brazing

916 Induction brazing

918 Resistance brazing

919 Diffusion brazing

92 Brazing with global heating

921 Furnace brazing

922 Vacuum brazing

923 Dip-bath brazing

924 Salt-bath brazing

925 Flux-bath brazing

926 Immersion brazing

93 Other brazing processes

94 Soldering with local heating

941 Infrared soldering

942 Flame soldering

Torch soldering, USA

943 Soldering with soldering iron

944 Drag soldering

945 Laser soldering

946 Induction soldering

947 Ultrasonic soldering

948 Resistance soldering

949 Diffusion soldering

95 Soldering with global heating

951 Wave soldering

953 Furnace soldering

954 Vacuum soldering

955 Dip soldering

957 Salt-bath soldering

96 Other soldering processes

97 Weld brazing

Braze welding, USA

971 Gas weld brazing

Gas braze welding, USA

- 972 Arc weld brazing
Arc braze welding, USA
- 973 Gas metal arc weld brazing
Gas metal arc braze welding, USA
- 974 Gas tungsten arc weld brazing
Gas tungsten arc braze welding, USA
- 975 Plasma arc weld brazing
Plasma arc braze welding, USA
- 976 Laser weld brazing
Laser braze welding, USA
- 977 Electron beam weld brazing
Electron beam braze welding, USA

Annex A (informative)

Process variants

A.1 Transfer modes

For welding processes where different modes are possible, the mode can be indicated by a letter in accordance with [Table A.1](#) and as shown in the example.

Table A.1 — Transfer modes

Mode	Term
B	Buried-arc transfer
D	Short-circuit transfer (dip transfer)
G	Globular transfer
S	Spray transfer
P	Pulsed transfer ^a
^a Referred to as "pulsed current" in ISO/TR 25901-4.	

EXAMPLE MIG welding with solid wire electrode using short-circuit transfer is designated as:

ISO 4063 – 131-D

A.2 Number of electrodes

If more than one electrode is used, it can be indicated by an additional number as shown in the example.

EXAMPLE MIG welding with two solid wire electrodes is designated as:

ISO 4063 – 131 – 2

A.3 Additional items

If additional filler material is used, the option hot wire/cold wire can be indicated in accordance with [Table A.2](#) and as shown in the example.

Table A.2 — Additional items

Mode	Term
C	Cold wire
H	Hot wire

EXAMPLE Submerged arc welding with a solid wire electrode and an additional cold wire is designated as:

ISO 4063 – 121-C

A.4 Plastics joining

Additional process variants for plastics joining can be identified in accordance with [Table A.3](#) and as shown in the example.

Table A.3 — Additional processes

Term	Reference number
Transmission laser welding – contour	52-A
Transmission laser welding – quasi-simultaneous	52-B
Transmission laser welding – simultaneous	52-C
Transmission laser welding – scan	52-D
Transmission laser welding – mask	52-E
Direct laser welding	52-F
Vibration welding with IR pre-heat	424-A
Heated wedge welding with hot gas	662-A
Heated wedge welding (electric)	662-B

EXAMPLE Heated wedge welding with hot gas is designated as:

ISO 4063 – 662-A

A.5 Staking

Staking process variants can be identified in accordance with [Table A.4](#) and as shown in the example.

Table A.4 — Staking processes

Term	Reference number
Electrical	E
Hot air	H
Infrared	I
Ultrasonic	U

EXAMPLE Staking with hot air is designated as:

ISO 4063 – 692-H

Annex B (informative)

Replaced and obsolete processes

[Table B.1](#) presents a list of processes included in previous editions of this document which have been replaced or have become obsolete. They may be used retrospectively or in special cases but shall then be designated as shown in the last column.

Table B.1 — Designation if replaced and obsolete processes

Former designation	Process	Designation to use
113	Bare wire metal arc welding Bare metal arc welding, USA	ISO 4063:1990-113
115	Coated wire metal arc welding	ISO 4063:1990-115
118	Firecracker welding	ISO 4063:1990-118
137	Tubular cored metal arc welding with inert gas shield Flux cored arc welding, USA	ISO 4063:1990-137
149	Atomic-hydrogen welding	ISO 4063:1990-149
181	Carbon-arc welding	ISO 4063:1990-181
32	Air-fuel gas welding	ISO 4063:1990-32
321	Air-acetylene welding Air acetylene welding, USA	ISO 4063:1990-321
322	Air-propane welding	ISO 4063:1990-322
43	Forge welding	ISO 4063:1990-43
752	Arc image welding	ISO 4063:1990-752
77	Percussion welding	ISO 4063:1990-77
781	Arc stud welding	ISO 4063:1990-781
787	Drawn arc stud welding with fusible collar	ISO 4063:1998-787
917	Ultrasonic brazing	ISO 4063:1990-917
923	Friction brazing	ISO 4063:1990-923
953	Abrasion soldering	ISO 4063:1990-953

Annex C (informative)

Acronyms for welding and allied processes used in the United States of America

Tables C.1 to C.4 present acronyms for welding and allied processes used in the United States of America.¹⁾ These are given together with corresponding reference numbers in this document, where such numbers exist. A dash signifies that no equivalent or corresponding reference number can be given.
